Stretch S1: Benchmark against a second site

Status: draft. Cells marked “Not measured yet” still need the second-site measurement.

Prepared by	Hayrunnisa İYİKÖŞKER (2203060011)
Site 1	Gaziantep Büyükşehir Belediyesi, https://www.gaziantep.bel.tr/
Site 2	Şahinbey Belediyesi, https://www.sahinbey.bel.tr/
Browser	Google Chrome 156.0.8078.80 (64-bit), Windows 11
Method	I repeated six checklist items (A1, A3, A4, A7, B2, B7) on the second site, with the cache disabled and no network throttling. Site 1 values come from my Core report. Dates and times of each screenshot are in the evidence log.

Comparison

Check	Gaziantep BB (site 1)	Şahinbey (site 2)	Better
A1 HTTPS and redirects	The http:// address answered with 301 Moved Permanently and sent the browser to https://www.gaziantep.bel.tr/, which loaded with status 200. Certificate valid (issued by Sectigo, expires 20 February 2027). [A1]	*Not measured yet*	-
A3 One request, closely	52 requests, 12.9 MB transferred (14.5 MB of resources). DOMContentLoaded at 2.87 s, full load at 6.35 s. [A3]	152 requests, 30.3 MB transferred (31.1 MB of resources). DOMContentLoaded at 1 min, full load at 2.6 min. [S1-A3]	Gaziantep BB (fewer requests, less data, faster in my measurements)
A4 A page that does not exist	Real 404 status. The visitor sees a friendly page with the logo, “Page Not Found!”, “Go to homepage” and “Go back” buttons and shortcut cards. The message is in English only. [A4]	Status 200 on the final page, so it is a soft 404. The address changed to /sayfayok?aspxerrorpath=/Default/no-such-page-123.aspx and the page shows only the plain text “Sayfa Bulunamıyor.. Anasayfaya dön”, with no logo or menu. The tab title is “Untitled Page”. [S1-A4]	Gaziantep BB (correct status, helpful page)
A7 SEO basics	Title, meta description, canonical link (https://www.gaziantep.bel.tr/), lang="tr" and exactly one h1 found. No sponsored or ugc links. [A7]	*Not measured yet*	-
B2 Empty state	Searching “zzzqqq” shows an icon, the message “Kayıt bulunamadı” and a “Tüm Etkinlikler” button. The filter shows “Toplam: 0 kayıt” and a “Temizle” button, and the typed text stays in the box. [B2]	*Not measured yet*	-
B7 Accessibility audit (Lighthouse)	Home page flagged: buttons without an accessible name (10 failing elements listed) and images without alt attributes. Score: not recorded yet. [B7]	*Not measured yet*	-

The two sites were measured at different times, so load times may be affected by the connection or by server load at that moment. Site 2 screenshots are named S1-<id>-site2.png in the evidence folder.

What the first site could learn from the second

To be written after A1, A7, B2 and B7 have been measured on the second site. It will be exactly three sentences, each based on a difference shown in the table.
